

How to download Team viewer VERSION 10.0 and Installation Steps.

Go to [this https://www.teamviewer.com/en/download/previous-versions/](https://www.teamviewer.com/en/download/previous-versions/) and download Team viewer Version 10, refer the screen shots below.

The screenshot shows the 'Previous versions' page on the TeamViewer website. The page has a blue header with the TeamViewer logo and navigation links: Support, Contact, Community, Blog, Login, Explore, Credentials, Download, Buy Now, and About Us. The main content area has a blue background with the text: 'Previous versions' and 'The downloads on this page are only recommended for users with older licenses that may not be used with the newest release.'

Annotations on the page include:

- A red circle with the number '1' pointing to the 'Version 10.x' link in the 'Versions' section.
- A red circle with the number '2' pointing to the 'TeamViewer' link in the 'Windows (v10.0.47484)' section.
- The text 'then click on this to download and install' is placed above the 'Windows' section.
- The text 'Click on this first' is placed between the 'Windows' and 'Versions' sections.

After installation follow the steps mentioned below.

1. Run the setup file you have downloaded previously
2. Select **Installation to access this computer remotely (unattended)** **1** under **How do you want to proceed?**
3. Under **How do you want to use TeamViewer?** select the option that suits you.
 - If you want to use TeamViewer commercially (for your Business), select **Company / Commercial use** **2**
 - If you want to use TeamViewer with friends and family, select **Personal / Non-commercial use** **3**
4. Click **Accept - finish** **4** to start the installation.

Configure unattended access to the device

You will then be asked to set up unattended access. It is recommended to set up unattended access, if you need to access this computer remotely at any time without having to confirm a connection any time you try to connect to your device.

Setting up unattended access is optional.

1. Set a **name** **1** and a **personal password** **2** for the device. Both will be needed for connecting to the device later. Proceed with **Next** **3**.

Unattended access - Step 1 of 2

Define personal password

Set a name and a personal password for this computer.

Computer name: MT-57

Password:

Confirm password:

You already defined a personal password. Enter it or a new one into the password field to store it in your list.

< Back Next > Cancel

2. To access to device quickly, it is recommended to add it to your list of computers and contacts. To do so, either create a new TeamViewer account **1** or use an existing

Unattended access - Step 2 of 2

Add this computer to Computers & Contacts

If you have a TeamViewer account you can add this computer to the list of your computers. In your computer list you will see if this computer is online and connect to it directly.

Create a free TeamViewer account

I already have a TeamViewer account
